JOB APPLICATION TRACKER

Using Job Application Tracker

Chrome on a computer | About 3 minutes

1. Your dashboard

Each row is a saved job. Click its role to open the details.
Use search or Filters to find jobs; change status as your application progresses.

About these screenshots

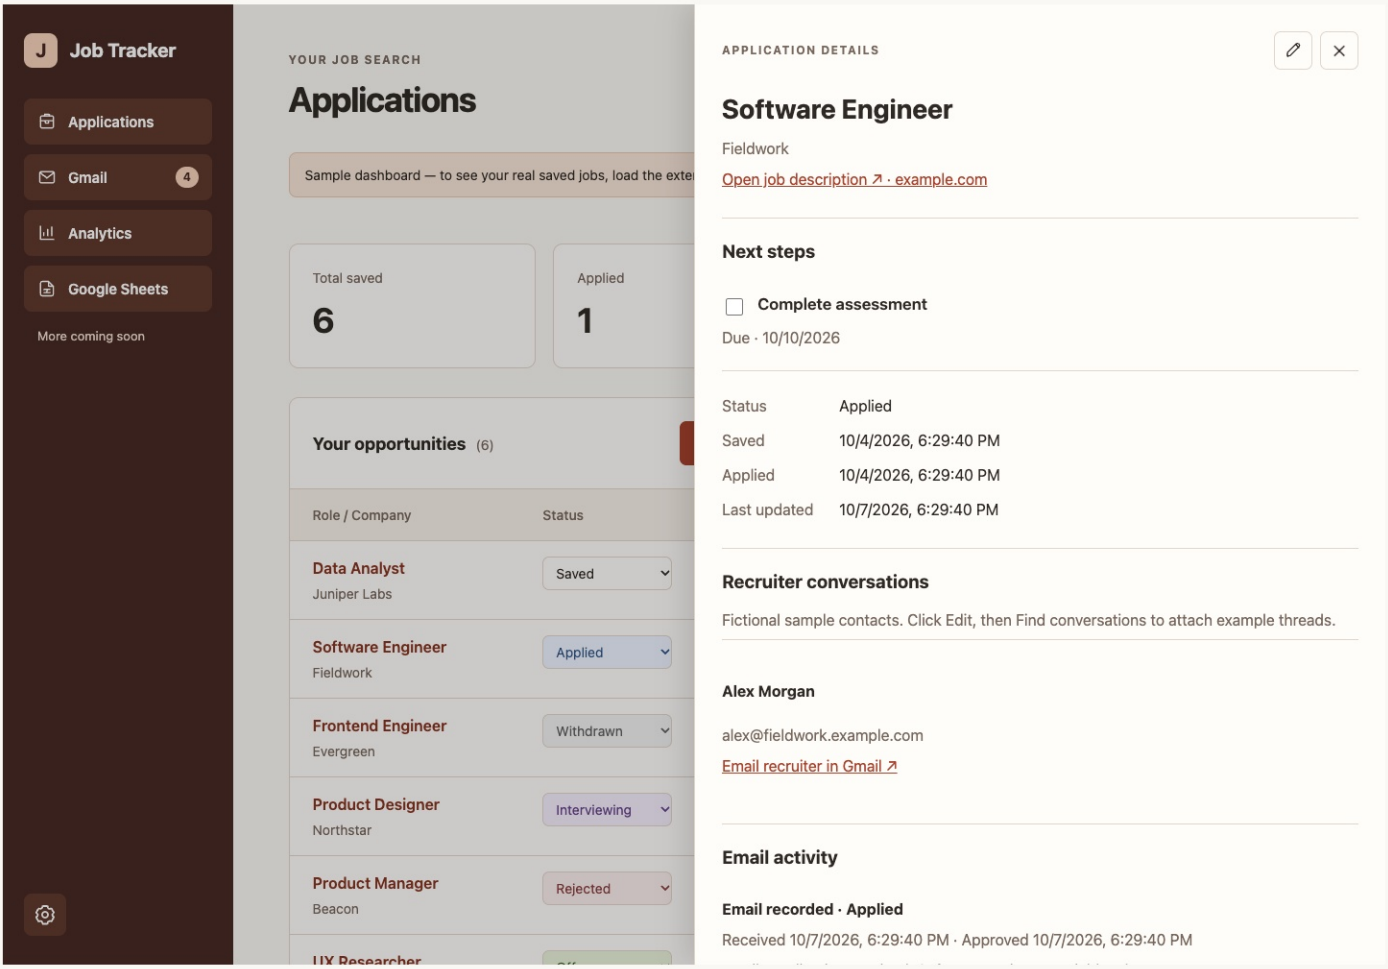

Actual browser captures of the sample dashboard with fictional jobs and emails.
Gmail search requires a connected account and is not demonstrated here.

Using Job Application Tracker

Chrome on a computer | About 3 minutes

2. Open a job's details

Keep next steps, dates, recruiter conversations and email history together.
Click the pencil icon to edit this job.
